

# Penske 7500 Series Pneumatic Bleed Off System

#214305

Use of this Pneumatic Bleed-Off System on Penske 7500 Series shocks has been shown to increase 60 ft times and give a better ride down the track. The system runs off an air bottle (not included) and is used to soften your shocks at a specified time to give you a smoother ride over any bumps at the top end of the track. Comes complete with all tubing needed to supply the shocks from the timer base.
